

## Topic Research

My topic is \_\_\_\_\_

1. What is the problem?
2. How does the problem affect your country? What has your country done to combat the problem? (Or if your country is not involved with the issue, how can it become involved?)
3. What are the various “sides” in the debate?
4. Which aspects of the issue are most important to your country?
5. How will your country shape the debate at the conference?
6. What arguments will other countries make, especially those in your regional bloc?
7. How do the positions of other countries affect your country’s position?
8. Is there evidence or statistics that might help to back up your country’s position?
