General Assembly Second Committee

Topic: Convention on biological diversity

Fully aware that we humans are disturbing our environment,

Deeply concerned by the loss of biodiversity,

Fully alarmed that the ecosystem is falling apart,

Bearing in mind that approximately 30,000 species are going extinct each year,

Highly regretful of our past actions of ignoring biodiversity,

Acknowledging the fact that biodiversity is declining here and now,

1. Calls upon all nations to put forth laws to prevent deforestation;
2. Noting the satisfaction that the price of a hunting license should increase;
3. Recognizing the need to build more animals preserves;
4. Encouraging all nations to use hair mats to absorb oil in the ocean;
5. Expressing hope that reusable, recyclable, replacements of everyday items be developed;
6. Contemplating lowering the price of wildlife food;
7. Prohibit the sale of endangered and wild animals;
8. Requesting nations make more “no hunting” zones;

9. Encourages the public to advertise the problems of biodiversity;

10. Calls upon all nations to limit the amount poaching.
