

General Assembly Second Committee – ECOFIN

Co-Sponsors: Antigua and Barbuda, Canada, Federative Republic of Brazil, Federative Republic of Germany, Hungary, Islamic Republic of Iran, Islamic Republic of Pakistan, Hellenic Republic (Greece), Kingdom of Morocco, Libya, Namibia, People's Republic of Bangladesh, People's Republic of China, Republic of Angola, Republic of Colombia, Republic of Fiji, Republic of Finland, Republic of Rwanda, Republic of Singapore, Russian Federation, Ukraine, United Kingdom of Great Britain and Northern Ireland, Republic of Ecuador

Topic: Agriculture Development, Food Security and Nutrition

Fully aware of the number of people living without adequate food,

Deeply concerned with the global average nutrition in food,

Bearing in mind that there is enough food in the world for everyone to have, but much of it goes to waste,

Taking into account that this is a worldwide problem, the sponsoring countries have agreed on the use of drones in an attempt to deliver seeds, food, water, medical supplies, and tools to rural areas,

Having examined the problem, we believe this is a good solution because the drones can travel many miles where other methods of shipping can't go,

Deeply convinced that this will work and will be able to assist malnourished families,

Accepting that improving food security is a difficult problem to solve,

Emphasizing its hope that undernourished families will benefit greatly,

Expressing that there are possible solutions,

Viewing with appreciation that the countries that signed feel strongly about agricultural development, food security, nutrition, and came up with these solutions,

1. Recommends the creation of more food banks with healthy food;
2. Calls upon volunteers to turn the foundation of abandoned buildings into green houses;
3. Supports the education of different sustainable farming techniques;

4. Urges people to grow more native plants;
5. Expressing its hope to start low waste and composting programs and grow local;
6. Encourages countries to grow non-perishable foods that can be stored longer;
7. Requests local farmers to set aside food to send to needy people;
8. Confirms that it will provide healthy nourishing meals to needy citizens;
9. Calls upon countries dealing with or without this problem to support this resolution.
