

Resolution GA/2/2.1

General Assembly Second Committee

Co-sponsors: Commonwealth of Australia, Kingdom of Belgium, Republic of Colombia, Republic of Croatia, Republic of Ecuador, Republic of India, Republic of Indonesia, Republic of Iraq, Hashemite Kingdom of Jordan, United Mexican States, Republic of Poland, Russian Federation, Republic of Rwanda, Republic of South Africa, Kingdom of Sweden and Republic of Uganda

Topic: Ensuring Access to Affordable, Reliable, Sustainable and Modern Energy for All

Emphasizing the importance of modern, renewable, eco-friendly, affordable, and sustainable energy resources,

Alarmed by the fact that only about 17.5% of the total energy worldwide is renewable,

Deeply concerned that about 769 million people lack access to clean energy sources,

Alarmed by the fact that about 4 million people die each year due to unsafe cooking situations,

Fully alarmed that around 87% of the 840 million people throughout the world live in rural areas and lack electricity,

Fully believing in educating others on the effects of harmful energy sources,

Observing most countries do not have clean and renewable energy sources,

Fully aware that people are using more fossil fuels than needed,

Taking note that roughly half of the world's population has no access to electricity, clean cooking fuels and technology,

Eco-friendly Renewable Energy Sources and Technology

1. Requests governments to invest in fuel-efficient vehicles along with their chargers;
2. Draws attention to solar, wind, hydroelectric, geothermal, tidal and bio-energy;
3. Approves the construction of sustainable architecture;
4. Recommends introducing an increased amount of sustainable energy in rural areas around the globe;
5. Considers the use of clean cooking technology for all;
6. Recommends the use of eco-friendly technology as it could play a significant role in eliminating the effects of climate change;
7. Recognizes the major challenge of breaking dependence on hydrocarbons and fossil fuel technologies;

Funding and Investments

8. Advises funding in renewable energy sources opposed to fossil fuels or nuclear power plants;
9. Encourages taxing industries that use fossil fuels more than others;
10. Advises investing and improving the consistency of electric vehicles;
11. Recommends funding renewable energy sources in developing countries for a stable economy;
12. Directs a fund for solar panels on roofs instead of fossil fuel plants;
13. Directs a fund for clean energy in home construction rather than using fossil fuels and power plants;

Spreading Awareness and Education on Harmful Energy Sources

14. Encourages education programs on harmful energy sources in schools, industries, and newscasts;
15. Recommends awareness through posters, flyers, and presentations;
16. Supports schools on educating all children on clean and affordable energy;
17. Expresses hope for the world to have clean and renewable energy;

Transitioning from Fossil Fuels to Modern and Reliable Energy Sources

18. Requests access to a larger quantity of electric vehicles;
19. Further requests investing in renewable energy sources;
20. Considers making fossil fuels more expensive than renewable energy;
21. Encourages making renewable energy more reliable and affordable for all;
22. Requests nations to establish more wind and solar farms;
23. Suggests to use PAVAGEN[®] floor tiles outside.
