

Resolution GA/2/2.1

General Assembly Second Committee

Co-sponsors: Commonwealth of Australia, Republic of Colombia, Republic of Costa Rica, Republic of Ecuador, State of Eritrea, Republic of Finland, Republic of France, Republic of Iceland, Republic of the Union of Myanmar, Kingdom of the Netherlands, Republic of South Africa, United Kingdom of Great Britain and Northern Ireland

Topic: Ensuring Access to Affordable, Reliable, Sustainable and Modern Energy for All

Bearing in mind the use of cars transportation has increased the amount of greenhouse gasses abundantly substantially,

Deeply concerned that the amount of unrenewable energy sources is high,

Affirming the potency and environmental friendliness of renewable energy it is important that all countries have access to renewable energy,

Expressing with hope that clean energy will become efficient and will go around the world,

Renewable Energy/Renewable Energy in Homes and Transportation

1. Calls for using your surroundings to create renewable energy, for example, sun for solar panels, mountains for wind turbines, and waterfalls for hydropower;
2. Demands to use more sustainable energy in homes;
3. Advises to use more biofuel;
4. Introduces the idea of satellites with solar panels;
5. Considers using some of uninhabitable space for sustainable energy generators;

6. Strongly encourages people to use nonmotorized methods of transportation when traveling short distances;
7. Also urges the government to educate willing workers and support builders on creating more sustainable sources;
8. Calls upon more donations and funds for more sustainable energy in homes and transportation;

Efficient Power, Investments, Fundraising, and Education

9. Advises the government to fulfill the requests for sustainable energy from our fellow countries along with investing in their scientific endeavors, it would assist with the movement to obtain 100% sustainable energy by 2030;
10. Introduces the idea to educate people on energy use;
11. Calls for emphasizing renewable energy to the world is a good strategy to show the importance of the problem;
12. Suggests that we educate willing people in renewable energy, thereby encouraging the relative reduction of energy usage;
13. Approves the idea of energy conservation;
14. Encourages the production of more sustainable energy facilities;
15. Further requests countries to donate renewable energy to the countries that need the most;
16. Strongly condemns people for unreasonable entertainment because it uses too much energy.
