Topic: Leaving No One Behind

Alarmed by the overpriced prosthetics and health care for those who need it,

Aware that gang violence is caused by people who do not have enough money to afford proper resources which causes poverty,

Emphasizes the increasing of hunger rates

Deeply concerned about the amount of crime such as child abuse around the world,

Alarmed by the fact that because of climate change, crops are affected in a negative way causing more people to fall into poverty forcing them to drink dirty water that makes them sick,

Poverty and Healthcare

1. Calls upon companies and the government to give basic resources to people who are in poverty;
2. Requests countries increase accessibility and decrease prices of medicine and prosthetics for people with disabilities;
3. Supports more affordable healthcare and health insurance programs to be used when urban planning;

Inequality and Violence

4. Encourages the governments to give everyone including workers equal distribution of resources;

Family Safety and Crime

5. Requests better councilors in school to look for signs of child abuse;
6. Further recommends counseling for children with divorced families and family separation;
7. Draws attention to child labor and robberies affecting children's lives;

Climate Change and Schooling

8. Recommends installment of affordable showers and laundry facilities;
9. Expresses hope that children will be educated on equality from a young age;
10. Emphasizes the construction of solar panels to provide safe and clean energy.
