

Resolution GA/2/I.1

General Assembly Second Committee

Co-sponsors: Commonwealth of Australia, Kingdom of Belgium, Republic of Colombia, Republic of Croatia, Republic of Ecuador, Republic of India, Republic of Indonesia, Republic of Iraq, Hashemite Kingdom of Jordan, United Mexican States, Republic of Poland, Russian Federation, Republic of Rwanda and Kingdom of Sweden

Topic: Protection of global climate for present and future generations of humankind

Bearing in mind that the rapid increase in climate change has led to 2020 being more than 1.2 degrees celsius or 2.2 degrees F hotter than about 170 years ago,

Deeply concerned by the fact that 1 out of 10 people are living without electricity,

Fully alarmed that deforestation, which is a factor of climate change, harms ecosystems, wildlife and the balance of carbon dioxide to oxygen,

Recognizing that if we don't stop climate change, irreversible damage will be done to the world,

Approving the growing rate of renewable energy while having a stable amount of different renewable sources of power,

Keeping in mind that 3 billion people lack clean cooking fuels and technology,

Alarmed by the number of wildfires, natural disasters, and other extreme weather phenomenon, which have resulted in an exceedingly large quantity of deaths around the world,

Drawing attention towards stopping the construction of non-renewable buildings, industries, and factories, while increasing construction of renewable buildings, home, factories, and industries,

Renewable and Innovative Technology

1. Encourages companies and industries to invest in sustainable and reliable energy sources for all;
2. Recommends transitioning into alternative power sources, such as wind, solar, hydroelectric, tidal, nuclear and bioenergy;
3. Recommends companies make energy-efficient, e-fuel vehicles;
4. Strongly encourages scientists to exhibit Geo-engineering and iron fertilization and their benefits;
5. Encourages the creation of organizations that impact renewable energy sources across the globe;
6. Believes that acting on the idea of sustainable architecture could drastically improve the condition of the environment;

Preservation of Wild-life and Wild-life Habitats

7. Encourages nations to preserve ecosystems and wildlife for future generations to come;
8. Recommends nations to sign treaties with other nations to reduce deforestation and other factors of climate change;
9. Strongly suggests restoring disturbed ecosystems by planting a large quantity and variety of vegetation;

Reducing Industry-Based Climate Change

10. Encourages governments to tax industries that use an unreasonable amount of fossil fuels, that is more compared to other industries;
11. Emphasizes the need for car industries that create electric cars instead of gas and takes note that electric cars need to be more efficient;
12. Directs nations to come to agreements with other countries to reduce greenhouse gas emissions;
13. Strongly encourages the UN to assist developing countries in the development of renewable energy;
14. Recommends that companies use more renewable energy in their company;
15. Encourages the development and the making of renewable-energy powered houses and buildings.
