Topic: Role of Science and Technology in the Context of International Security

Emphasizing the threat of unhindered criminal activity online,

Observing the clear connection between the spread of false information and online danger,

Alarmed by the lack of job opportunities and interest in science and technology development,

Taking into account the situation of under developed countries in the context of science and technology,

Advancements in Science, Technology, and Education

- I. Encourages other countries to spread awareness on the use of private VPNs;
- 2. Emphasizes the importance of transparency in the field of science and technology;

Inclusivity

3. Recommends the creation of education program, such as science and technology, for all including minority groups;

Transparency in Social Media

February 2023 Montessori Model United Nations Conference New York City

- 4. Advises platforms to be transparent to the public;
- 5. Expresses our hope that more advanced security and transparency will protect countries, communities, and people online;

Cybersecurity and Online Safety

- 6. Advises large platforms to keep displayed information and content appropriate in order to maintain a safe community;
- 7. Further invites higher cybersecurity funding towards other organizations in need;
- 8. Stresses that platforms and people fact-check their sources and review their anti-malware.
